

## M204 Screening Room AV Instructions

1. Turn on the projector using the Sony projector remote. “input-D” should appear on the screen. If not, press the **INPUT D** button on the remote.
2. Make sure the power to the AV rack is turned on.
3. Press the rectangular button (located on the Onkyo receiver) for the device you wish to display:

---

### **To project from the iMac:**

Press the “**iMac (PC)**” button on the receiver. For best results set System Preferences> Displays> TX-NR525 to 1080p.

### **To project from a laptop:**

Plug the mini display port cable into your laptop. Press the “**Laptop (GAME)**” button on the receiver. For best results set System Preferences> Displays> TX-NR525 to 1080p (Television).

### **To project from the Blu-ray player:**

Press the “**Blu-ray**” button on the receiver. Use the Blu-ray remote to control playback.

### **To project from a HDMI device:** (iPad, iPhone, camera, etc.)

Plug a HDMI cable into the AUX HDMI input on the rack, and into your device. Press the “**HDMI (AUX)**” button on the receiver.

### **To play sound from an iPod or iPhone:**

Plug a USB cable into the iPhone/iPod input on the receiver, and into your device. Press the “**iPhone/iPod USB (F)**” button on the receiver.

---

**Make sure to turn off the system when finished:** Press “**STANDBY**” on the Sony projector remote. Turn off the receiver by pressing the **POWER** button.
